

CPN Exam Prep. A Practice Exam with 5 Contact Hours.

Our CPN Exam Prep is an online practice testing tool that helps nurses prepare for the structure of CPN exam questions related to pediatric nursing content in the following areas:

- Assessment
- Health Promotion
- Management of Illness, Psychosocial/Behavioral and Chronic Care/End of Life
- Professional Role

5 Contact Hours. 50 Questions. Participants receive fifty questions and a score report to help them assess their strengths and weaknesses prior to taking the exam. Plus they'll receive in-depth explanations of all right and wrong answers to help them understand the rationale for each correct answer. Once a nurse completes this learning activity, a CE certificate of NAPNAP accredited continuing education is immediately available for printing.

Even if you offer a review course... CPN Exam Prep can still be beneficial because nurses will become familiar with the way our questions are presented. This way, questions on the actual exam won't seem so intimidating. And detailed feedback about why an answer is correct—or incorrect—provides continuing education.

We offer ICAP hospitals the opportunity to provide this continuing education activity for their nurses. CPN Exam Prep is currently \$50 and can be added to your nurses' exam applications if you'd like. Simply indicate your choice with PN CB staff when you return the Agreement to Participate, and we will set up this process for your staff.

"It's wonderful to help staff be successful."

- Sharon Ransom, Education Coordinator, Cook Children's Hospital
