

You have CPNP expert care here.

What is a Certified Pediatric Nurse Practitioner (CPNP)?

CPNPs have graduate level education in providing health care for children and adolescents.

CPNPs must pass a rigorous national board exam and then demonstrate continued learning every year.

During visits, CPNPs promote optimal physical and emotional well-being for children.

CPNPs have the knowledge and skills to:

- Diagnose
- Order tests
- Treat and manage care
- Prescribe
- Make referrals

We look forward to providing care for your child!
