

CONTENT OUTLINE FOR
PRIMARY CARE PEDIATRIC UPDATES

The goal of these learning activities is to increase knowledge and enhance clinical practice through review of current evidence and clinical resources relevant to APRNs who provide care to pediatric age groups in primary care.

- Each module offers specific learning outcomes and objectives, ranges between 35 and 40 questions, and has a minimum of 2-year availability to purchase.
- Module content is based on data from annual needs assessment surveys as well as trending topics in contemporary pediatric health care literature.

Primary Care Current Concepts	Primary Care Specialty Topics	Both types of modules include (but are not limited to):
<p>Current Concepts modules provide a broad overview of a variety of concerns seen in pediatric primary care.</p> <p>Published annually, they provide reading material and post-test questions which reflect topic review or recent evidence-based information for APRNs who provide care to pediatric age groups in primary care.</p>	<p>Specialty modules more narrowly target contemporary health care concerns for children, families, and communities.</p> <p>Published annually, but focused on different topics each year, they provide reading material and post-test questions which reference a specialty-problem focus.</p> <p>These modules may address problems across the spectrum where children and adolescents are evaluated, with the primary focus on the outpatient setting.</p>	<ol style="list-style-type: none"> 1.
